

CAN YOU
IMAGINE A
WORLD

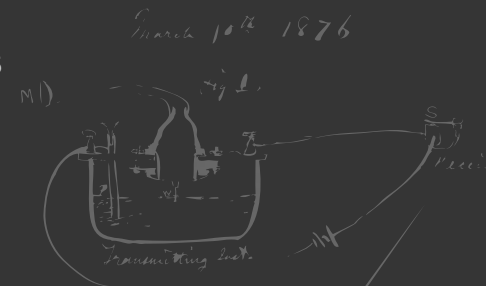

in which nobody takes
the first step?

A WORLD

in which nobody ever crosses
existing barriers?

1. The improved instrument shown in Fig. 1 constructed this morning and tried this morn. P is a brass pipe and W the platinum M the mouth piece and S the arm of the Receiving Instrument.

Mr. Watson was stationed in one with the Receiving Instrument - He pressed ear against S and closed his

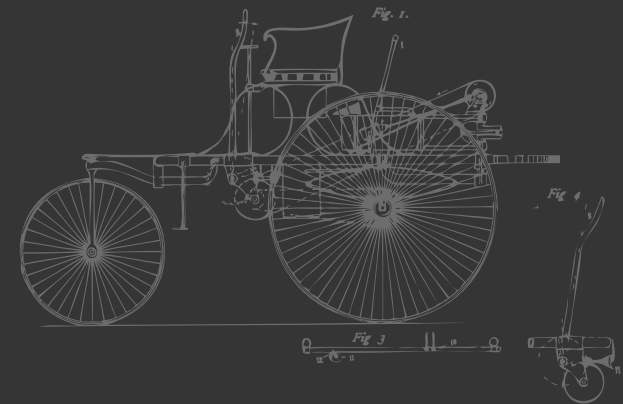

ALEXANDER GRAHAM BELL
PATENTS THE FIRST TELEPHONE IN 1876.

A WORLD

without the perseverance or courage
to believe in new ideas?

CARL BENZ

BUILDS THE FIRST PETROL-POWERED CAR IN 1886.

... WITHOUT PIONEERS?

OUR WORLD IS BAKING OVENS – AND WE ARE PIONEER

1973

Master butcher
Karlheinz Wiesheu
and his wife Marga
establish WIESHEU
GmbH

1980

Development of the
first baking oven with
a transparent door for
bakeries and butchers

1984

WIESHEU crosses
boundaries and
presents the first
combined deck oven
and convection oven

1989

Introduction of the
revolutionary
Euromat convection
oven series

1995

WIESHEU receives
the German
Innovation Prize

1996

Invention of the fully
automatic self-cleaning
system ProClean

1975

WIESHEU builds the
first convection oven
specially designed for
butchers

1981

WIESHEU is first baking
oven manufacturer to
hold 'roasting and baking
seminars'. Today they
remain a forum for users,
manufacturers and the
trade

1986

WIESHEU invents
the right/left rotating
fan, revolutionising
baking results

1994

WIESHEU does things
on a new scale: the
Minimat oven series

1996

Patenting of a completely
new steaming system –
the cascade steaming
system to provide just the
right amount of steam at
any temperature

ERS HERE

1998

WIESHEU is the first manufacturer to use halogen lighting in its oven door frames, setting new standards in the presentation of freshly prepared baked goods

2000

Introduction of ovens with menu guidance by means of a graphic programme selector using icons, meaning even semi-skilled personnel are able to operate the oven safely

2002

WIESHEU builds the first multiglazed oven door for reducing energy consumption

2003

WIESHEU revolutionises the baking oven and presents the Dibas. The only baking oven with a door that disappears. With the Dibas, WIESHEU sets completely new standards in terms of function, design and freedom of movement

2004

Introduction of the first intelligent control system for the easy programming and monitoring of WIESHEU baking ovens from a PC using data transmission.

2005

Development of loading systems for the efficient loading of baking ovens

2006

WIESHEU presents revolutionary heating technology: STIR® technology and new microwave technology

2007

WIESHEU presents the Dibas with manual sliding door

WIESHEU PRESENTS

THE NEW OVEN SYS

DIBAS

THE DIBAS DOOR

disappears sideways into the housing, fully automatic at the touch of a button or manually with servo control

HYGIENIC BAKING CHAMBER

with no corners or edges for simple cleaning, fully automatic or manual operation

NEW BAKING CHAMBER

for even baking results

NEW EBO DOOR WITH CLEANING POSITION

for easy cleaning of the oven door on both sides

EBO

XXL GLASS PANEL

presents your baked goods attractively, making your customers hungry for more

VARIO STATION

30% SHORTER BAKING TIMES

with the optional STIR® technology

2009

TEM

A system in which the most varied of innovations come together to create an oven system that will continue to be pioneering, even in the future.

MINIMAT

1.8-LITRE WATER TANK
for flexible operation without connection to the mains water supply

A LOT OF ROOM IN A LITTLE SPACE
as a Vario station, two Minimat baking ovens can be stacked, one on top of the other

EASYCLEAN
thanks to a baking chamber with no corners or edges and easy-to-remove internal parts

For this visionary project we have incorporated the best and most pioneering ideas. We have invested all our concentrated power and knowledge from 36 years in the business in order to create something that sets completely new standards: we have built the perfect baking oven system.

To do this, we have enhanced and perfected our baking ovens right down to the very last detail. A completely new door mechanism, a new baking chamber for even better baking results, new controls that are more intelligent and user-friendly, a higher degree of energy efficiency and a more attractive design. The result is the WIESHEU baking oven system. An oven system on which our new range is based. An oven system so perfect that you will no longer need to look elsewhere.

With this oven system, we give you a perfect range of products for the most varied of demands and we finally provide an answer to the question of how revolutionary evolution can be.

You'll be amazed!

VARIO BAKING STATION
as Vario stations, the Ebo deck oven and Dibas convection oven can be freely combined
